the auto sector is north america s most iconic of industries since the north american free trade agreement came into existence in 1994 the sector has undergone tremendous change escalating concerns around climate change advances in electric and automated vehicles deindustrialization reindustrialization and the rise of low cost locations as hubs for manufacturing the north american auto industry since nafta examines the issues that have preoccupied the development of policy associated with the manufacture of automobiles in north america the collection addresses the punctuations that have afflicted the industry since nafta s implementation as well as the slower incremental evolutions that have also occurred several aspects of automobility and the industry are explored including but not limited to the canadian american and mexican automotive sectors and their evolution and interaction under evolving trade regimes the book analyses issues surrounding labour technology trade policy regional development the environment and broader societal impacts of the automobile it also draws on the expertise of a wide cross section of industry experts and scholars to provide readers with a deeper understanding of the automotive industry and its central role in north america s economic business and political landscape

over the past forty years state provincial and local governments in the united states and canada

have provided foreign automakers with approximately 4.80 billion in incentives in order to lure light vehicles assembly plants to their areas this has included tax abatements infrastructure construction land giveaways job training programs and other subsidies as of early 2015 ten foreign vehicle makers operated 20 light vehicles in developed north america despite the fact that all ten of these automakers have pursued a similar pattern first exporting vehicles into the united states and canada before launching vehicle plants in developed north america each has followed its own specific historical development path and has created its own unique growth trajectory this book provides a unique historical and qualitative review of these ten vehicle makers from their early beginnings to their export entry into the united states and or canada through early 2015 in addition it chronicles the histories of more than a dozen former automakers and potential future foreign light motor vehicle assembly plants in the united states and canada this includes the first foreign automaker to build its cars in the united states de dion bouton of france in july 1900 the early 20th century endeavors of fiat mercedes and rolls royce and the present day hopes of chinese and indian automakers in the process the text also provides an assessment of the top competing states and sites for any future plants the possible incentives packages governments may offer to attract such facilities and an estimated incentive value for each automaker overall the goal of this book is to expand the knowledge of policymakers at all tiers of government in the united states and canada and to help them take a more holistic look at the pros and cons of attracting automobile manufacturing fdi it is hoped that this will enable them to make more informed decisions when pursuing a new foreign motor vehicle assembly plant its findings should also prove informative to urban and regional planning political science sociology economics labor and international development scholars and students in north america and worldwide

an in depth hard hitting account of the mistakes miscalculations and myopia that have doomed america s automobile industry in the 1990s detroit s big three automobile companies were riding high the introduction of the minivan and the suv had revitalized the industry and it was widely believed that detroit had miraculously overcome the threat of foreign imports and regained its ascendant position as micheline maynard makes brilliantly clear in the end of detroit however the traditional american car industry was in fact headed for disaster maynard argues that by focusing on high profit trucks and suvs the big three missed a golden opportunity to win back the american car buyer foreign companies like toyota and honda solidified their dominance in family and economy cars gained market share in high margin luxury cars and in an ironic twist soon stormed in with their own sophisticatedly engineered and marketed suvs pickups and minivans detroit suffering from a good enough syndrome and wedded to ineffective marketing gimmicks like rebates and zero percent financing failed to give consumers what they really wanted reliability the latest technology and good design at a reasonable cost drawing on a wide range of interviews with industry leaders including toyota s fujio cho nissan s carlos ghosn chrysler s dieter zetsche bmw s helmut panke and gm s robert lutz as well as car designers engineers test drivers and owners maynard presents a stark picture of the culture of arrogance and insularity that led american car manufacturers astray maynard predicts that by the end of the decade one of the american car makers will no longer exist in its present form

this title was first published in 2002 the interest in becoming globally competitive through network strategies particularly networks between small and medium sized firms in local business communities is high among academic researchers economic development agencies and growth orientated firms important contributions to our understanding of the strategic use of networks are coming from a number of disciplinary and theoretical perspectives this volume provides a unique opportunity to both synthesize this diverse literature and report the results of original research it is particularly relevant to scholars of business and management geography and economics
