long story of teaching i taught chemical engineering thermodynamics for about ten years at the university of naples in the 1960s and i still remember the awkwardness that i felt about any textbook i chose to consider all of them seemed to be vague at best and the standard of logical rigor seemed immensely inferior to what i could find in books on such other of the students in my first class subjects as calculus and fluid mechanics one who is now prof f gioia of the university of naples once asked me a question which i have used here as example 4.2 more than 20 years have gone by and i am still waiting for a more intelligent question from one of my students at the time that question compelled me to answer in a way i didn't like namely i'll think about it and i hope i'll have the answer by the next time we meet i didn't have it that soon though i did manage to have it before the end of the course
